New 31 DVI and 33 DVI Gas Inserts Now In-stock

I am very pleased to introduce our new price-point gas inserts, the small gas insert, the 31 DVI and the large 33 DVI. These inserts represents a new direction in gas heating that allows you to offer a top-quality gas fireplace insert at a competitive price for your value-conscious customers. The 31 DVI and 33 DVI inserts are all about basics: a big, beautiful, brightly glowing fire and a simplified operating system, yet offering the same glass viewing area as the DVS GSR & DVL GSR. The DVI series of inserts features the Dancing-Fyre™ split-flow, steel pan burner that allows your customer to select a big fire display.

Both DVI Inserts feature huge turn-down-rates:

31 DVI: 31,000 Btu maximum rating down to 10,700 Btu NG on lowest setting (12,600 Btu LP).

33 DVI: 40,000 Btu maximum rating down to 11,900 Btu NG on lowest setting (7,400 Btu LP).

The log set is also unique to these models. We don't skimp on detail and this log set and flame rivals all competitors.

To keep this model uncomplicated, we eliminated the accent light capability. We do offer a number of useful, efficient options so your customers can choose to create the heating system they need to do the job. They will find the optional 180 CFM, variable speed blower with snap switch quite useful for heat distribution, and if convenience is on their list, our new On/Off/ Temperature remote thermostat provides push-button control.

The 31 DVI and 33 DVI share same dimensions and installation requirements as the DVS GSR and DVL GSR inserts.

The standard reversible brick fireback for the DVS GSR and DVL GSR is also compatible, a popular option even value conscious customers frequently opt for.

Imagine A FIREPLACE IN EVERY ROOM®

All the DVS and DVL faces you already know are compatible, too. Faces you have in stock from the new DVS GSR and DVL GSR inserts all fit this model. Plus - we will soon introduce a new Universal design, price-point face in large and small "No-Panel" face sizes to give your budget-conscious customers a really nice way to complete their new insert! This gives you maximum interchangeability of accessories for your convenience and stocking efficiency, and your customer can add additional beauty now or later, as their budget allows.

You will want to order a 31 DVI and 33 DVI now to be able to show it yet this season. In an effort to show this model as a value comparison, I suggest you refrain from dressing it up to its maximum capability, contrasting the value of the DVI line-up with your top-of-the-line DVS GSR or DVL GSR.

New 31 DVI Gas Insert

SKU#	DESCRIPTION
98400092	Insert, 31 DVI
99000167	Fan, DVI, Insert
