Cover Plate (ANSWER & HOMEFIRE ONLY)
When using outside air with the Answer or HomeFire stoves, a replacement cover plate is required to ensure combustion air is drawn from below.

Cover Plate Replacement
a. Remove the bridge plate – Remove the (2) screws that secure the bridge plate to the air control plate (set aside for reinstallation). Remove the air control plate and gasket – Remove the (2) screws that secure the air control plate to the air control.

b. Discard the stock air control plate and gasket.

c. Install the replacement air control plate and gasket – secure the plate and gasket to the air control using the (2) screws removed in step (a). Reinstall the bridge plate and secure using the screws removed in step (a).
Outside Air Kit
sku# 99200139

Outside Air Knock-Out (ANSWER & HOMEFIRE ONLY)

Remove the forward knock-out on the bottom of the stove.

Installation

NOTE: If wall is thicker than 8", attach the flex duct to the hood then slide the hood into place.

Endeavor, Liberty, Evergreen, Rockport & Cape Cod
Use the included hose clamp to secure the flex duct to the 3" air inlet collar at the bottom rear of the appliance.

HINT: The flex must be fully stretched and the ends cut square and flattened for it to fit properly. The tube on the hood and air duct may be crimped if necessary.
