

There are many variables to consider in determining what product is the best fit for your home. Print out this worksheet and fill in all the information that you can. Bring this information with you when you visit your local dealer to assist them with understanding the scope of the project so that they can best assist you in the selection of a hearth product based on your home layout and heating requirements.

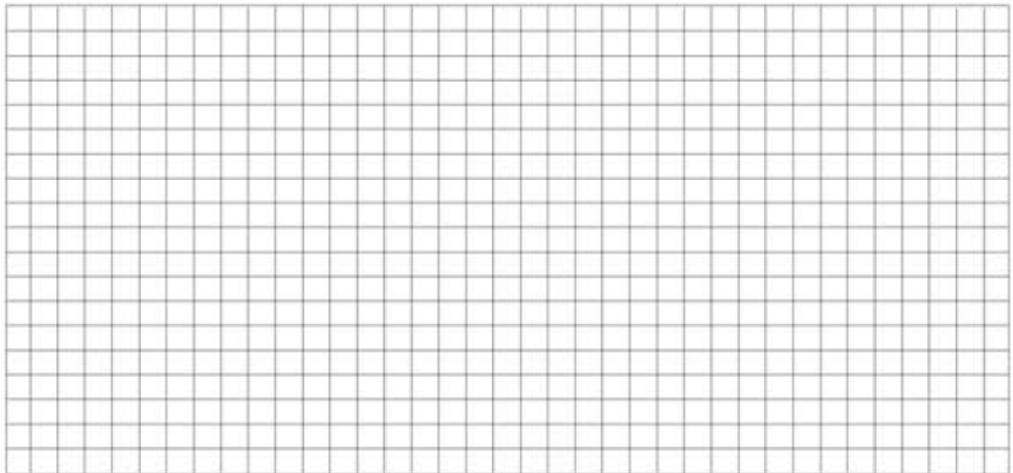

Are you looking at the right type of appliance for your project?

Zero-clearance fireplaces are typically installed during the construction of a new home or as a part of a remodel project. Zero-clearance fireplaces are designed to be framed into a wall without the need to be contained in a pre-existing wood-burning fireplace. If you have a pre-existing masonry or zero-clearance wood fireplace ask your dealer about the many gas insert options that Travis Industries offers and consult with them about what type of appliance is most appropriate for your application.

Project Contacts Name: _____
Email Address: _____ Phone # _____
Address of installation: _____
Preferred timeframe for the installation _____

1. Do you have a fireplace in mind for your project? If so, what model? _____
2. What year was the home built? _____
3. How well insulated is the home? _____
4. What is the square footage of the home? _____
5. Square footage are you wanting to heat with this appliance? _____
6. Will this installation use natural gas or propane? _____
7. Is there gas in the home already? _____
8. Has gas already been piped to the desired location of the fireplace? _____
9. What other gas appliances are in the home? _____
10. Will this installation be a part of new construction or a remodel? _____
11. How many stories is the home? _____
12. What is the ceiling height in the desired location of the installation? _____
13. Will this installation be in a basement? _____
14. If so, is it a daylight basement or is it below grade? _____

15. On the grid to the right, sketch out the floor plan of the space. Mark the location where you would like the new appliance installed.

NOTE: Scan the QR code to see a framing guide for all of our fireplaces.

NOTE: If the installation is part of a remodel or replacement of an existing fireplace it would be helpful if you could supply the dealer with pictures of the room, existing fireplace (if applicable), the roofline, and the outside of the structure (close to where the installation will be).
